THE PERFECT TEMPERATURE AT YOUR FINGERTIPS

Ariston NET offers customers more control when managing their heating system, just using a smartphone. In fact, with Ariston NET, customers can remotely set their ideal temperature at home, manage their energy use and reduce energy bills by up to 25%¹.

EASY TO INSTALL. EASY TO MANAGE. EASY TO CONTROL.

^{*} Ariston NET will allow you to save up to 25% on your energy bill when used with a boiler in 'AUTO' function mode with Sensys Room Thermostat, Outdoor Sensor, accurate timer programming as well as the user monitoring an energy consumption and adjusting the time schedule to reflect an actual comfort needs.
^{*} If a Wi-Fi network is not available, a GPRS version can be purchased. ^{*} Also available for the Galileo platform with Room Sensor.

COMPLETE PEACE OF MIND 24/7

Ariston NET not only provides customers with comfort and savings, but also great reassurance. The speed of intervention and the certainty of always having the right spare part to hand gives customers complete peace of mind and avoids unnecessary costs. With the ability to continually monitor the heating system and solve any problems before the consumer is aware of them, the advantages are endless for both consumers and professionals.

Avoid any delays by offering customers the best possible support. With its remote analysis functionality, Ariston NET enables professionals to provide excellent service to customers, in the fastest way possible.

A POWERFUL AND USER-FRIENDLY APP FOR CONSUMERS

COMFORT

- Manage your heating and hot water temperature from anywhere using a smartphone, tablet or PC
- Achieve maximum comfort with 7-day programming facility and up to 4 heating periods per day
- Unplanned schedule changes? Simply override the programming with a click of a button.
- Maximise energy efficiency by easily adjusting the temperature in different zones of the home or in multiple properties remotely

ENERGY SAVING

- Lower your energy bills by learning from your consumption behaviour and monitoring your energy usage in real-time
- Reduce energy consumption by setting two temperatures in the home for times when less heat may be required (e.g. at night)
- Ensures the intelligent management of the room temperature by reducing the number of on/off cycles of the boiler for maximum efficiency

PEACE OF MIND

- Real-time notification of the error description as soon as one occurs so that a user can respond to the problem wherever they are
- With Ariston NET's Remote Diagnostic service, you can receive instant technical support 24/7
- Reassurance of minimum disruption thanks to remote boiler fixing^{*}

^{*} If you have the subscription to an after sales service and the fault doesn't require any spare parts

A ROBUST AND INTUITIVE PLATFORM FOR PROFESSIONALS^{*}

CUSTOMER RETENTION

- Improve customer retention whilst maximising time by remotely diagnosing the customers boiler in real-time
- View and react to real-time notifications to avoid customer heating downtime
- Minimise the customer's heating downtime by having direct access to all system functions, fault codes and boiler parameters at a click of a button

^{*} Service charge may be applicable

EXTENDED BUSINESS OFFERING

- Offer customers added value service with remote boiler monitoring and fixing
- Support customers by offering enhanced service offerings and maintenance contracts

INCREASED OPERATIONAL EFFICIENCY

- Live monitoring display "Fault notification" for better business management and job prioritisation
- Save time and costs by ensuring the right parts are taken to site first time round
- With Ariston NET's Remote Diagnostic service, faults can be identified instantly allowing remote fixing by simply changing a parameter or resetting the boiler
